**Example of a Branching Ratio**

Examples of three ways that  $^{226}\text{Ac}$  decays. The quantity to the right is the fraction of times that a particular decay occurs. The sum is not 100% because the numbers are rounded.

$^{226}\text{Ac}$	$\square$	$^{226}\text{Th} + e^- + \bar{\nu}$	83%
$^{226}\text{Ac} + e^-$	$\square$	$^{226}\text{Fr} + \square$	17%
$^{226}\text{Ac}$	$\square$	$^{222}\text{Fr} + {}^4\text{He}$	0.006%
